The Owner/Agent listed above, hereby requests that Rainbow Municipal Water District ("District") provide water service to the service address listed.

The Owner/Agent agrees to assume full responsibility for all charges on this account from the effective date of service and to abide by the District's policies and regulations. The Owner/Agent further agrees to notify the District when responsibility for this account ceases and to provide a forwarding address for the closing bill. If the Owner/Agent's account becomes overdue, the District retains the right to discontinue service after sufficient notification and to charge any applicable penalties and late fees. Responsibility for delinquent water bills by a tenant rests with the Owner/Agent. (State Water Code 71618, 72100 & 82101)

The Owner/Agent agrees to notify the District immediately of any proposed changes in their water system that allows injection of fertilizer or any other substance into the irrigation system or connection of any other water sources to their system. When the District Cross Connection Control Specialist determines the need for a reduced pressure principal backflow (RP), the Owner/Agent hereby agrees to abide by District policy to install an approved RP and maintain it at their expense.

BY SIGNING BELOW, OWNER/AGENT DECLARES UNDER PENALTY OF PERJURY AS FOLLOWS:

1. I have the following legal authority to submit an application for a water service connection as set forth above:
 - I am the legal owner of the parcel(s) subject to this request and have attached proof of ownership.
 - I am an authorized agent of the owner of the parcel(s) subject to this request and have attached proof of such authorization hereto.
2. I will immediately notify the Finance Manager of the District if any of the following occur at any point prior to completion of the water service connection application process:
 - a. I cease to have authority to request a water service connection at the subject property; or
 - b. There is a proposed change in ownership of the parcel(s) subject to this application. (See Section 6 below)
3. I hereby request that the District approve water service to the service address and for the use listed on this application with the understanding that all costs for plan checks, installation, materials, appurtenances, and inspection shall be paid by Owner/Agent. Prior to starting work, Owner/Agent shall comply with the following requirements:
 - a. Provide an electronic or paper copy of the proposed plans to be reviewed by District staff along with a plan check application and fees (\$465 per page per Ordinance 22-11).
 - b. Obtain the necessary State of California/San Diego County permits or approvals relative to the water service connection construction work; and if required, a State Highways Utilities Encroachment Permit and/or a County Encroachment Permit per the District's Construction Standards Manual.
 - c. Obtain approvals or permits for the service connection from utility companies, as applicable.
 - d. Obtain an Encroachment Permit for work completed within a District easement, as applicable.
 - e. The Owner shall hire a contractor with a class "A" license to install the water service facilities in accordance with the District's Standards and Specifications and must meet the District's insurance requirements. The contractor shall contact the District's Engineering department at engineeradmin@rainbow.ca.gov at least 14 days prior to beginning any work to schedule an inspection.
 - f. For parcels of over one acre, the owner agrees to have the property inspected for verification of the proper size meter.
 - g. Customers living in high pressure areas (150 PSI or above) will be required to sign a *Notice of High-Water Pressure Condition* form and agrees to install a pressure regulator on their side of the meter. Customers living in low pressure areas (20 PSI) will be required to sign a *Notice of Low-Water Pressure Condition* form and agrees to install at his/her cost a booster system to be owned, operated and maintained by the Owner/Agent, his/her successors and assigns.
 - h. Owner/Agent understands that the District assumes no responsibility for damage or injury due to water pressure.
 - i. Once the project has been accepted by the District's Board of Directors, the Owner warrants the work to be free of defects for 12 months from the date of acceptance. The District will become responsible for the daily operation and maintenance of the water service after acceptance. The remaining balance of the inspection deposit minus staff time will be returned to the Owner following the 12-month warranty phase provided there are no issues or defects.
4. Approval of this application for service is contingent upon payment in full of all water service connection fees, service charges, delinquent water bills and penalties due and charged to or against said property by the District.
5. A water service connection application is issued for a term of two years from the date of issuance. **The Date of Issuance of this water connection application is _____ and the expiration date is _____.** If the connection is not made prior to the expiration date, this water service connection application shall expire and all rights of the water service connection application holder resulting from the issuance of such application shall terminate. Fees paid with a water service connection application that has expired will be refunded, minus administrative costs, to the application listed on the application.

If, prior to the expiration date of the water service connection application, a building permit has been issued by the County of San Diego or governing agency for the building or buildings described in this application, and a copy of the building permit is provided to the District, the application shall not expire and need not be renewed. In such case, the District's application shall expire upon the expiration of the building permits.

If connection complying with all District Standards is made prior to the expiration of the application (or building permit per above), the application will become an authorized water service permit for the subject property(s) to receive potable water from the District's water system in accordance with all District rules and regulations related to the use

described in this water service connection application. Once a service connection is made to the District facilities and extended to the property, the account is considered active and will incur water service charges per District policy.

- 6. If Owner/Agent desires to sell the property during the term of this water service connection application and transfer the water service connection application with the same parcel of land and use, the applicant must submit written notice of the proposed transfer to the District. The new owner must then complete a new application and the expirations date will remain the same.
- 7. I acknowledge that this request is subject to, and approval is conditioned on, compliance with current District policy. I agree that compliance with the conditions of this water service connection application shall be binding on the applicant, successors or assigns, and subsequent property owners. Prior to sale or transfer of this property after water service connection, I agree to provide written notice of the conditions set forth herein to the new property owner.
- 8. In the event the District incurs any costs or suffers any damage as a result of misrepresentation, any failure to notify District of a change in authority for this water service connection application, a change in ownership of the parcel(s) subject to this application, a change in control of water service under District policy, determination that this request is improper for any reason, or unauthorized use of the water service connection, I understand and agree that I will be solely responsible for, and will indemnify, defend and hold the District harmless from any such costs and damages, including, but not limited to, the District's reasonable attorney fees.
- 9. I acknowledge that the District has the right to refuse or to discontinue water service at any time to protect the District from any fraud or for noncompliance with, or violation of, any District policy, ordinance, rule or regulation of the District arising from this request.
- 10. The District shall endeavor to furnish continuous and sufficient supply of water to its Customers to avoid any shortage or interruptions of delivery. It cannot, however, guarantee complete freedom from interruptions. The District will not be liable for interruptions or shortage of supply, nor for any loss or damage occasioned by its failure to supply water. (Administrative Code Section 8.010.010)

DISTRICT USE ONLY

If the applicant is not the legal owner of the property, describe the evidence submitted by the applicant to show his or her legal authority to make this request:

Cross Connection

An approved Reduced Pressure Principal Backflow Preventer (RP) is required depending upon the degree of hazard on sizes 1" and under. For service 1½" and larger an approved RP is mandatory on a potable water service connection. RPs must be tested by a Certified Tester immediately after they are installed, relocated or repaired prior to service connection.
